Fresh air × dehumidification × HEPA filtration in one ceiling unit.
Independent fresh-air valve, return-air valve, HEPA filter, and a 5-in-1 air detector — auto-switching across dehumidify, fresh-air, mixed, and intelligent modes.

新風 × 抽濕 × HEPA 過濾，一台天花機完成。獨立新風閥、回風閥、HEPA 高效濾網與五合一空氣探測器，可於抽濕、新風、混合、智能四個模式之間自動切換。

01 ABOUT THE GEC V SERIES

System overview

The GEC V Series is the flagship fresh-air ceiling dehumidifier engineered for Hong Kong's sub-tropical climate. It maintains target humidity while continuously introducing HEPA-filtered outdoor air — solving CO2 build-up, PM2.5, cooking odours, and humidity in a single concealed unit. The 5-in-1 air detector reads PM2.5, CO2, VOC, temperature, and relative humidity, switching modes automatically.

GEC V 系列為 ERV.hk 旗艦新風天花式抽濕機，專為香港氣候研發。在維持空間濕度的同時，引入經 HEPA 過濾的潔淨新風——一機解決室內 CO2 累積、PM2.5、烹飪異味與潮濕問題。內置五合一空氣探測器自動偵測 PM 2.5、CO2、VOC、溫度與濕度，並於四個模式之間智能切換。
